

## **12V & 24V LOW ENERGY EFFICIENT LIGHTING**

**EPA Products IP65 24VDC & 12VDC Bulkhead Lamp Installation**

*It is recommended to use a seal between the through box and the light fitting*

- **The light fittings can be supplied in four options:**

**12VDC: 13Watt / 1.09AMP  
18Watt / 1.3AMP**

**24VDC: 13Watt / 0.54AMP  
18Watt / 0.65AMP**

EPA Products Ltd has over five years experience Manufacturing low voltage Lighting and Control Systems for the Free Range Poultry Industry.

The light fittings are designed to be energy efficient and to produce maximum light (18w 12v or 24v models) produces an output of 1150 LUMENS of white light.

These light fittings should not be confused with cheaper compact fluorescents lighting found in the camping and leisure industry as they produce a blue tinted light.

The light enclosure is Manufactured from a shatter proof polycarbonate and is water resistant to an IP65 rating

The light fitting is fitted with two-stage lighting (main Filament bright light LED filament for low light) to assist with a simulated dusk dawn lighting control.
