

EPA Led Symmetry Control Dimmer Unit

The EPA LED Symmetry control dimmer was designed with micro processor control to eliminate flicker associated with dimmable Led lights. Simple installation can be retro fitted to most lighting systems when upgrading to Led lighting. There is no requirement to install lighting filters / chokes or snubbers.

Features

- Micro Processor control self stabilising to eliminate light flicker.
- Suitable for a wide range of AC main power supplies
- Simple installation.
- Agricultural – Horticultural – Aquatic – Industrial and Home Automation Lighting Systems.

Specification

Power Regulator:	Maximum Load 2500W (with adequate heat dissipation)
Supply Voltage Range:	85V AC – 265V AC 50/60Hz
Control Signal:	0-10v / 5K Potentiometer
Part No.	REGU19
Kit complete with potentiometer, knob & dial	REGU19KIT
