

DTD Programmable Lighting Control

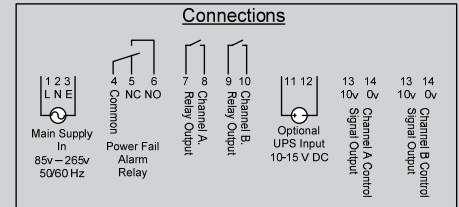

The DTD (Dusk till Dawn) lighting processor control is a versatile simple to use unit, fitted with its own internal time clock, eliminating the need for a separate time clock and the ability to set a real time lighting pattern.

The unit is primarily designed to work with any of the EPA Products and Agri- Lamp lighting systems Including ALIS System

FEATURES

- Lighting pattern works in real time with the age of the flock
- Independent ramping up time / ramping down time
- Lighting Boost Facility to over ride the lighting intensity for a preset duration (eliminates human error)
- Two independent lighting controls for split lighting system A & B Control
- Simple Mode Setting Switches for single channel or two channel operation and enhanced lighting pattern
- Alarm output for lighting control power supply failure
- Power Supply 85vac – 250vac 50/60Hz
- Input for 12vdc UPS Power Supply
- Lighting Control output 0 - 10v signal
