

# LOW VOLTAGE FREE RANGE POULTRY SHED EQUIPMENT

## Custom Built Low Voltage Control Systems

- Low voltage control panels for:  
Lighting Systems - Feeder Systems – Nest Box Systems
- Battery management Systems and Alarm Systems

## Lighting 12V & 24VDC

- 12VDC & 24VDC IP65 Compact Fluorescent Lighting
- Low Voltage Photo Cell Light Sensors
- Replacement Lighting Filaments

## Low Voltage Time Clocks

- 24 Hour Time Clocks 12VDC & 24VDC for Lighting & Feeder Controls
- Feeder Track Run Timers
- Delay Timers and Cycle Timers 12VDC & 24VDC

EPA Products Ltd has designed and manufactured 12v & 24v Low voltage control systems for over five years eliminating a lot of the problems and reliability associated with low voltage systems.

The controls systems are custom built to customer's requirements from 50 bird units to over 2000 bird units.

Control Systems are offered for simple to sophisticated energy efficient lighting systems.

Feeder control systems for Track Feeders, Pan Feeder Systems with sophisticated proximity switch and Cross Auger Controls.

Nest Box expeller control and egg conveyor control systems.

Battery power management controls from simple voltmeters to battery computers to indicate power consumption, rate of charge from external wind and solar power.

To help monitor remote poultry shed EPA Products Ltd can offer Radio Alarm systems suitable for a maximum range of 2Km to GSM alarms that work on Pay as You Go mobile phone network.

The low voltage industry is growing fast and EPA Products Ltd is continually developing new products for the industry and is proud to supply equipment to major mobile poultry shed manufactures and producers.
