

Landline Speech Dialler

The EPA Landline Speech Dialler is intended for use as an automatic message dialler. The primary use for the dialler is for connection to the existing farm alarm system.

The unit will dial up to four telephone numbers with call acknowledgement.

The dialler offers one common message (Farm name) and one short alarm message without the need for expensive tapes.

Powered by its own 12vdc power which is trickle charged under normal conditions.

Both the mains supply and telephone line inputs are protected against lightning and surge.

To help prevent false call outs and adjustable time delay is fitted which is adjusted by the installer.

A four digit user code switches the dialler on and off and a separate operators four digit code is used to change dial out parameters.

Fitted in an IP65 Plastic enclosure with a clear hinged cover.

- Self powered no need for batteries
- Four digit security code
- Lightning and surge protection
- Telephone line monitor
- Low power monitor
- Three way call feature (in the event of the dialler being used on a shared line, the dialler will park the incoming call in the event of an emergency)
- View last call log
- Fitted to Robust IP65 Plastic Enclosure with Clear Hinged
